

SUMMARY OF ESTIMATED ANNUAL BURDEN
[OMB No. 3064-0198]

Information collection (obligation to respond)	Type of burden (frequency of response)	Number of respondents	Number of responses per respondent	Time per response (HH:MM)	Annual burden (hours)
1. Generic Information Collection for Qualitative Research, (Voluntary).	Reporting (Once)	10,000	1	01:00	10,000
Total Annual Burden (Hours)	10,000

Source: FDIC.

General Description of Collection: The FDIC is requesting renewal of this approved collection to use occasional qualitative surveys to gather information from the public to inform qualitative research. While the subject and nature of the surveys to be deployed under this information collection are yet to be determined, based on prior experience it is expected that the number or respondents will range from a few to, at times, several thousands, but, in general, these surveys are expected to involve an average of 500 respondents. Likewise, the time to respond to the surveys can range from a few minutes to several hours, but, it is expected that the average time to respond to a survey is approximately one hour. These surveys are completely voluntary in nature. FDIC estimates that approximately 20 such surveys will be conducted in any given year. Currently, the FDIC has a variety of methods to collect quantitative information from consumers and institutions (e.g., Call Reports, FDIC National Survey of Unbanked and Underbanked Households, etc.). Qualitative data would provide complementary information on insights, opinions, and perceptions that will inform how the FDIC approaches its mission to safeguard financial stability of the banking system and promote consumer protection and economic inclusion. This clearance would allow the FDIC to engage with consumers and other relevant stakeholders through qualitative research methods such as focus groups, in-depth interviews, cognitive testing, and/or qualitative virtual methods. The purpose of the surveys is, in general terms, to obtain anecdotal information about regulatory burden, problems or successes in the bank supervisory process (including both safety-and-soundness and consumer related exams), the perceived need for regulatory or statutory change, and similar concerns. The information in these surveys is anecdotal in nature, that is, samples are not necessarily random, the results are not necessarily representative of a larger class of

potential respondents, and the goal is not to produce a statistically valid and reliable database. Rather, the surveys are expected to yield anecdotal information about the particular experiences and opinions of members of the public, primarily staff at respondent banks or bank customers. The collection is noncontroversial and does not raise issues of concern to other Federal agencies; with the exception of information needed to provide remuneration for participants of focus groups and cognitive laboratory studies, personally identifiable information (PII) is collected only to the extent necessary and is not retained. Participation in this information collection will be voluntary and conducted in-person, by phone, or using other methods, such as virtual technology. The types of collections that this generic clearance covers include, but are not limited to: Small discussion groups; focus groups of consumers, financial industry professionals, or other stakeholders; cognitive laboratory studies, such as those used to refine questions or assess usability of a website; qualitative customer satisfaction surveys (e.g., post-transaction surveys; opt-out web surveys); and in-person observation testing (e.g., website or software usability tests).

There is no change in the substance or methodology of this information collection.

Request for Comment

Comments are invited on: (a) Whether the collections of information are necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information

technology. All comments will become a matter of public record.

SUPPLEMENTARY INFORMATION:

A. Paperwork Reduction Act

Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that ten or more persons submit information to a third party. FHFA’s collection of information set forth in this document is titled “Federal Home Loan Bank Capital Stock” (assigned control number 2590–0002 by OMB). To comply with the PRA requirement, FHFA is publishing notice of a proposed three-year extension of this collection of information, which is due to expire on November 30, 2023.

B. Background

The Federal Home Loan Bank System consists of eleven regional Federal Home Loan Banks (Banks) and the Office of Finance (a joint office that

issues and services the Banks’ debt securities). The Banks are wholesale financial institutions, organized under authority of the Federal Home Loan Bank Act (Bank Act) to serve the public interest by enhancing the availability of residential housing finance and community lending credit through their member institutions and, to a limited extent, through certain eligible nonmembers. Each Bank is structured as a regional cooperative that is owned and controlled by member institutions located within its district, which are also its primary customers. An institution that is eligible for membership in a particular Bank must purchase and hold a prescribed minimum amount of the Bank’s capital stock in order to become and remain a member of that Bank. With limited exceptions, only an institution that is a member of a Bank may obtain access to low cost secured loans, known as advances, or other products provided by that Bank.

Section 6 of the Bank Act establishes capital requirements for the Banks and requires FHFA to issue regulations prescribing uniform capital standards applicable to all of the Banks.¹ Section 6 also establishes parameters relating to the Banks’ capital structures and requires that each Bank adopt a “capital structure plan” (capital plan) to establish, within those statutory parameters, its own capital structure and to establish requirements for, and govern transactions in, the Bank’s capital stock.² FHFA’s regulations on Bank Capital Requirements, Capital Stock, and Capital Plans are located at 12 CFR part 1277.

C. Need for and Use of the Information Collection

Both the Bank Act and FHFA’s regulations state that a Bank’s capital plan must require its members to maintain a minimum investment in the Bank’s capital stock, but both permit each Bank to determine for itself what that minimum investment is and how each member’s required minimum investment is to be calculated.³ Although each Bank’s capital plan establishes a slightly different method for calculating the required minimum stock investment for its members, each Bank’s method is tied to some degree to both the level of assets held by the member institution (typically referred to as a “membership stock purchase requirement”) and the amount of

advances or other business engaged in between the member and the Bank (typically referred to as an “activity-based stock purchase requirement”).

A Bank must collect information from its members to determine the minimum capital stock investment each member is required to maintain at any point in time. Although the information needed to calculate a member’s required minimum investment and the precise method through which it is collected differ somewhat from Bank to Bank, the Banks typically collect two types of information. First, in order to calculate and monitor compliance with its membership stock purchase requirement, a Bank typically requires each member to provide and/or confirm an annual report on the amount and types of assets held by that institution. Second, each time a Bank engages in a business transaction with a member, the Bank typically confirms with the member the amount of additional Bank capital stock, if any, the member must acquire in order to satisfy the Bank’s activity-based stock purchase requirement and the method through which the member will acquire that stock.

The OMB number for the information collection is 2590–0002, which is due to expire on November 30, 2023. The likely respondents include current and former Bank members and institutions applying for Bank membership.

D. Burden Estimate

FHFA has analyzed the time burden imposed on respondents by the two collections under this control number and estimates that the average total annual hour burden imposed on all respondents over the next three years will be 20,245 hours. The estimate for each collection was calculated as follows:

1. Membership Stock Purchase Requirement Submissions

FHFA estimates that the average annual number of current and former members and applicants for membership required to report information needed to calculate a membership stock purchase requirement will be 6,550, and that each institution will submit one report per year, resulting in an estimated total of 6,550 submissions annually. The estimate for the average time required to prepare, review, and submit each report is 0.7 hours. Accordingly, the estimate for the annual hour burden associated with membership stock purchase requirement submissions is (6,550 reports × 0.7 hours per report) = 4,585 hours.

¹ See 12 U.S.C. 1426(a).

² See 12 U.S.C. 1426(b), (c).

³ See 12 U.S.C. 1426(c)(1); 12 CFR 1277.22, 1277.28(a).

2. Activity-Based Stock Purchase Requirement Submissions

FHFA estimates that the average number of daily transactions between Banks and members that will require the exchange of information to confirm the member's activity-based stock purchase requirement will be 300, and that there will be an average of 261 working days per year, resulting in an estimated 78,300 submissions annually. The estimate for the average preparation time per submission is 0.2 hours. Accordingly, the estimate for the annual hour burden associated with activity-based stock purchase requirement submissions is (78,300 submissions × 0.2 hours per submission) = 15,660 hours.

E. Comment Request

In accordance with the requirements of 5 CFR 1320.8(d), FHFA published an initial notice and request for public comments regarding this information collection in the **Federal Register** on August 8, 2023.⁴ The 60-day comment period closed on October 10, 2023. FHFA received no substantive comments.

FHFA requests written comments on the following: (1) whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has practical utility; (2) the accuracy of FHFA's estimates of the burdens of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.
